Directions & Countryside

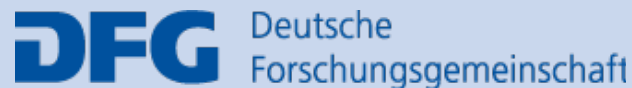

Obertrubach is located at the heart of the Franconian Switzerland and the natural preserve-Franconian Switzerland - Veldensteiner Forst. The about 150 Million years old rocks of the valley are formed by the manifold karst formation within the last 120 Million years, followed by the generation of the Trubach valley by erosion. Obertrubach can be reached by car via A3 (exit Höchststadt ost), A73 (exit Buttenheim) and A9 (exit Weidensees).
